

About the Program

The Industrial Manufacturing Technician Pre-Apprenticeship helps high school students begin a pathway to a career in manufacturing. Due to changing manufacturing technologies, entry-level workers require higher skills than before, and employers are struggling to recruit and retain these types of workers. We currently have 2 state registered Pre-Apprenticeship programs: IMT Pre-Apprenticeship and Advanced IMT Pre-Apprenticeship. These two programs directly connect to one another and allow students to receive 7 industry recognized certifications after completion of both.

Online Curriculum

- **IMT Pre-Apprenticeship Program**
 - 2 modules, ability to receive 3 certifications
 - Safety and Quality
- **Advanced IMT Pre-Apprenticeship Program**
 - 2 modules, ability to receive 4 certifications
 - Manufacturing Processes & Production and Maintenance Awareness

Key Benefits for Students

- Stackable credentials that are a foundation for multiple career pathways
- Leads to industry-recognized credentials recognized nationally
- Career exploration activities with local manufacturing companies
- Hands-on activities directly connected to the curriculum
- Career coaching to assist in starting a career in manufacturing
- Networking with other pre-apprentices from other local school districts
- Guaranteed job interview upon completion of the two online certifications
